Summary

Data Analyst / People Analytics professional with 4+ years of experience in workforce analytics, ETL, Power BI, SQL, and Python, plus MBA and analytics-focused Masters.

Work Experience

Program Manager and Analyst, Project Management Institute, USA | Oct 2025 – Present

- Drove strategic university outreach to launch a PMI-affiliated Student Club, expanding the academic pipeline and **contributing to a 5% increase in annual membership registrations and revenue.**
- Built **10+ survey analytics dashboards** applying the 30/60/90 framework and EDA to surface member insights, gaps, and opportunities for leadership stakeholders.
- **Engineered a real-time dashboard to integrate SharePoint and OneDrive replicating ThoughtSpot analytics**, automating membership reporting and enabling self-service data access across teams.
- Led end-to-end coordination of monthly volunteer meetings, owning agenda development and stakeholder alignment to drive actionable process improvements.

AI Analyst, Capstone Project, Intelmatix, USA | Apr 2025 – Jun 2025

- **Built a Gen-AI database assistant** that bridged non-technical users and complex data systems, enabling self-service access and **cutting manual query time by 40%.**
- Optimized prompt structures for Anthropic Claude (LLM), **improving natural language-to-SQL accuracy by 30% through iterative prompt engineering**, multi-dataset validation, and error-handling workflows.
- Designed automated **data visualization workflows across 5+ datasets and industries**, transforming raw query outputs into actionable insights.
- Engineered ER diagram interpretation and image-to-structure parsing pipelines that converted visual schemas into query-able data models, **eliminating a key bottleneck in stakeholder-to-technical communication.**

Deputy Manager, People Analytics, VFS Global, Mumbai, India | Aug 2020 – Jan 2024

- Deployed end-to-end employee lifecycle analytics across tenure milestones using a 30/60/90 survey matrix, EDA, and feature extraction to measure satisfaction and attrition drivers, delivering region-specific dashboards that **lifted engagement to 97% and satisfaction to 74%.**
- Led design of an **AI-powered Policy Creation Tracker with Leena AI**, applying stop-word analysis to build a standardized 'Drafting Checklist' embedded in the employee chatbot, **achieving 81% improvement in policy standardization, 8% reduction in annual human hours, and faster review cycles across 144 countries.**
- **Engineered automated ETL pipelines using Python and SQL to consolidate HR data across 8 global regions**, standardizing formats, eliminating manual prep, and improving dashboard refresh reliability and data accuracy.
- **Delivered executive dashboards in a data storytelling format** presenting policy progress, resource utilization, quota alignment, and performance metrics **positioning analytics as a strategic narrative tool in global leadership forums.**

Key Projects

Student Engagement Analysis | Northeastern University, USA

- Engineered 15+ interactive dashboards to monitor KPIs across student engagement programs, to gain insights that reduced program gaps.
- Conducted A/B testing on outreach campaigns to evaluate strategies, driving measurable improvements in event participation and campaign ROI.
- Led fit-gap analysis to propose DEI focused strategies in educational programs, for organizing culturally inclusive events across academic initiatives.

Spotify Music Analysis | Northeastern University, USA

- Architected a reproducible ETL pipeline in Python to ingest, cleanse, and load 50,000+ music records from disparate sources into Power BI, ensuring data integrity and pipeline scalability for downstream analysis.
- Performed multivariate feature analysis on audio attributes to uncover correlations that empower music producers to make, data-driven decisions.

Technical Skills

- **Programming & Databases:** SQL queries, Python scripting, R programming, HTML, MySQL, MS SQL Server
- **Data Visualization:** Power BI, Tableau, Excel (advanced), Qlik, Power Query
- **Systems Knowledge:** AWS, Hadoop, Snowflake, Visual Studio Code, JIRA, HRIS, Workday
- **Analytics:** Data Analysis, Predictive Modeling, Machine Learning, ETL pipelines, Workforce Analytics
- **Libraries:** pandas, NumPy, Matplotlib
- **AI Tools:** Anthropic Claude API, LLM Prompt Engineering, Open AI GPT - 4, GitHub Copilot

Education

- Masters of Science in Data Analytics | Northeastern University, USA | Jan 2024 – Jun 2025
- Masters of Business Administration, Human Resources | University of Mumbai, India | Aug 2018 – Oct 2020

Certifications

- Microsoft Azure AI Essentials - Microsoft, IL
- Human Skills in the Age of AI - Microsoft, IL
- Career Essentials in Data Analysis - Microsoft, WA
- AI in the Workplace – Northeastern University, WA
- Building Generative AI Apps to Talk to Your Data – Snowflake, WA
