

SHRADDHA GUPTA

Data Analytics, Business Analytics, People Analytics

Chicago, IL | +1 206-501-8951 | shraddha.p.gupte@gmail.com | [linkedin.com/in/shraddhagp](https://www.linkedin.com/in/shraddhagp)

Work Experience

Program Manager and Analyst | Project Management Institute

Oct 2025 – Present

- Managed strategic university outreach and partnership coordination to establish a PMI-affiliated Student Club, growing the chapter's academic pipeline and contributing to a 5% increase in annual membership registrations and chapter revenue through expanded student engagement initiatives.
- Designed and implemented 10+ end-to-end survey analytics dashboard system to gain member insights by performing EDA to identify gaps and strategy opportunities, for leadership and stakeholders.
- Built a real-time Power BI membership analytics dashboard by integrating data from SharePoint and OneDrive, to enable non-leadership members and leads to self-serve accurate, up-to-date membership data without relying on manual reporting.
- Led end-to-end coordination and facilitation of monthly volunteer meetings, including agenda development, stakeholder alignment, and structured discussion frameworks to drive actionable process improvements and foster organizational impact.

AI Analyst, Capstone Project | Intelmatix, USA

Apr 2025 – Jun 2025

- Developed a generative AI-powered database assistant using Python, Streamlit, and Pandas that bridged the gap between non-technical business users and complex data systems, enabling self-service data access and reducing manual query creation time by 40%.
- Optimized prompt structures for Claude 3.7 Sonnet (LLM), improving natural language-to-SQL accuracy by 30% through iterative prompt engineering, multi-dataset validation, and error-handling workflows, enabling real-time, coherent analytics outputs across the platform.
- Designed and integrated automated data visualization workflows across 5+ datasets, transforming raw query outputs into actionable dashboard insights and accelerating end-to-end time-to-insight for both technical and non-technical end users.
- Engineered ER diagram interpretation and image-to-structure parsing pipelines that translated visual database schemas into query-able data models, eliminating a critical bottleneck in how business stakeholders communicated data needs to technical teams.

Deputy Manager, People Analytics | VFS Global - Visa Facilitating Services, Mumbai, India

Aug 2020 – Jan 2024

- Deployed end-to-end employee lifecycle analytics across tenure milestones, EDA and feature extraction to measure satisfaction index, and attrition drivers to deliver region-specific dynamic dashboards that contributed to an improvement of engagement to 97% and satisfaction to 74%.
- Led the design implementation of an AI-powered Policy Creation Tracker in collaboration with Leena AI, using Python stop-word analysis to develop a standardized Policy Drafting Checklist embedded into the employee chatbot, to automate pre-review workflows and achieving 81% improvement in policy standardization efficiency, 8% reduction in annual human hours, and accelerating review and publishing cycles across 144 countries.
- Built and managed global people analytics dashboards across 8 regions, to translate complex workforce KPIs into stakeholder visuals for leadership, by conducting sessions to understand the pain points and priorities to ensure insights were actionable and aligned to regional decision-making.
- Engineered automated ETL pipelines using Python and SQL to consolidate HR data across 8 global regions, standardizing data formats, eliminating redundant manual preparation steps, and significantly improving dashboard refresh reliability and data accuracy for real-time workforce reporting.
- Delivered executive-level workforce intelligence through Power BI dashboards designed in a data storytelling format, presenting policy standardization progress, resource utilization, quota alignment, and performance metrics to senior leadership, positioning analytics as a strategic narrative tool used in global presentations and leadership decision-making forums.

Key Projects

As a Graduate Data Analyst | Student Engagement Analysis | Northeastern University, USA

- Engineered 15+ interactive dashboards to monitor KPIs across student engagement programs, to gain insights that reduced program gaps.
- Conducted A/B testing on outreach campaigns to evaluate strategies, driving measurable improvements in event participation and campaign ROI.
- Led fit-gap analysis to propose DEI focused strategies in educational programs, for organizing culturally inclusive events across academic initiatives.

As a Data Analyst | Spotify Music Analysis | Northeastern University, USA

- Architected a reproducible ETL pipeline in Python to ingest, cleanse, and load 50,000+ music records from disparate sources into Power BI, ensuring data integrity and pipeline scalability for downstream analysis.
- Performed multivariate feature analysis on audio attributes to uncover correlations that empower music producers to make, data-driven decisions.

Education

- Masters in Data Analytics, Evidence Based Management | Northeastern University, USA

Jan 2024 – Jun 2025

- Masters of Business Administration, Human Resources | University of Mumbai, India

Aug 2018 – Oct 2020

Technical Skills

- **Programming & Databases:** SQL queries, Python scripting, R programming, Shell scripting, HTML, MySQL, MS SQL Server
- **Data Visualization:** Power BI, Tableau, Excel (advanced), Qlik
- **Systems Knowledge:** AWS, Hadoop, Snowflake, Visual Studio Code, JIRA, HRIS, Workday
- **Analytics:** Data Analysis, Predictive Modeling, Machine Learning, ETL pipelines, Workforce Analytics
- **AI Tools:** Anthropic Claude 3.7 Sonnet, Open AI GPT - 4, GitHub Copilot

Certifications

- Career Essentials in Data Analysis - Microsoft, WA
- AI in the Workplace – Northeastern University, WA
- Building Generative AI Apps to Talk to Your Data – Snowflake, WA
- Data-Driven HR: AI-Powered People Analytics for Workforce Planning and Employee Experience – SHRM-CP, WA
